THE IRMA FAIR DREW CROWDS

The sixteenth annual fair and exhibition of the Irma Agricultural Society was held on August 14th and 15th and it proved to be one of the best exhibitions ever held since the fair was organized. There were over 800 cattle in all classes of good quality in stock, vegetables, products of the farm and field, and ladies home work.

The attendance on the last day was exceptionally good and the program of events was well carried out.

The midway attracted a pretty fair crowd and altogether the sixteenth annual exhibition will be remembered as a success from every angle.

The dance and show in the new hall proved a fitting climax to a successful fair.

SURVEY MARKS SHOULD BE PRESERVED

In a long-settled farming district practically every farm is fenced around and the adjoining neighbors know the lines where their farms meet. These lines do not in any case correspond with the surveyed lines but from mutual agreement and long occupation they are accepted as the actual boundaries of the farms. The fact that some hundred and sixty acres farm, for instance, is short one or two acres may not seem to be very important, but if land is worth one hundred dollars an acre as it is in many parts of Canada, it is a matter of some concern when a farm is short even an acre. The present owner would be better pleased if the first settlers in the district had been more careful of the original survey marks and had run out their farm lines in correct position. His title calls for one hundred and sixty acres, the assessed value of his farm is based on that area, and he pays taxes on it and must continue to do so unless he goes to the expense of having a survey made of his land as it exists and having his title corrected to the true acreage.

In those parts of our country which have been more recently settled or are being settled upon now, it should be a matter of first importance to the residents to preserve the marks of the survey. In western Canada where all the original surveys have been made by the Topographical Survey, Department of the Interior, survey posts accompanied by pits, mounds, or trenches as the case may be have been placed to mark the corners of the quarter-sections. The description of these survey marks are recorded at the Department at Ottawa, where information concerning them is always available. The survey post, whether it be one of the new style consisting of a cast iron pipe filled with cement carrying a brass cap on top, the plain iron bar in use for many years, or even made of wood as used in the earliest surveys, marks the exact corner and the pits, etc., are merely to help perpetuate the corner and to indicate where the post is or should be. If it happens that the post is gone but remains of the pits or mounds can be seen a letter addressed to the Topographical Survey, Department of the Interior, Ottawa, will bring information as to the correct location of the true corner in reference to the pits or mound.

There is a severe penalty imposed by law upon anyone who willfully removes or tampers with survey monuments, but the loss to the owner and to the community generally is just the same whether the survey is lost willfully or just through neglect of ordinary precautions to preserve it. Once a survey corner is lost it can be re-established only by a new survey. It is true that all the adjoining may agree upon their line if they are all so disposed but any one may refuse and then a survey with its consequent expense is required to relocate the line and restore the monument. It therefore pays everyone interested in the occupation or ownership of land to use every endeavour to preserve the survey marks. If one is in doubt as to what should be done, he should write to Ottawa for advice.

After next Thursday, Mr. Cook, the jeweller and optician intends taking a vacation and will not return till September 13th. He will be in Irma here each Thursday after this date.

WOMEN'S INSTITUTE COLUMN.

A special meeting was held at the home of Mrs. Maguire Friday, when the Dominion Secretary, Mrs. A. H. Rogers of Fort Saskatchewan spoke to the ladies present.

All those who heard her were glad that they had done so and went away feeling that they knew more about the work of the Institute and were encouraged to go ahead with the work.

There were thirty members and visitors present and after a dainty lunch served by the hostess and members the meeting adjourned to meet with Mrs. Ray the first Thursday in September, when a report will be given by Mrs. Bert Long delegate to the Wainwright Constituency Conference held there Saturday Aug. 11th.

DIPHTHERIA.

Diphtheria is an acute communicable disease caused by certain bacilli which live best in the throat of little children. These bacilli form a powerful poison which destroy certain tissues of the body. The tissues most readily affected are the nerves, the heart and the glands, as well as the throat. The effect of this poison or toxin may be temporary or permanent. Eight percent of all diphtheria is cured in ninety-nine percent of cases where antitoxin is used in adequate dosage during the first twenty-four hours of the sore throat stage of the disease. Antitoxin when given to well children will prevent them from contracting diphtheria for a period of from three to six weeks. Toxin-Antitoxin, however will prevent the occurrence of diphtheria for at least five years in all people and this immunity will last for the lifetime of many. Toxin-Antitoxin is administered by a physician in three doses at intervals of one week. One series of three doses is sufficient to immunize eighty percent of all children. Some children who have a diphtheria will require a second series of three additional doses.

The Schick Test has been devised to determine definitely whether a child is susceptible to diphtheria and would contract it if exposed or whether he is immune. Nearly all children under school age are susceptible after they are over six months of age. All children between the ages of six months and sixteen years should be given one series of toxin-antitoxin. Not less than six months and not more than one year later they should be given the Schick Test. This will tell which of the children need the second series. Toxin-Antitoxin prevents diphtheria. Take your children to the doctor and have them immunized. Make Canada a safe country for children.

Further information can be had in the Red Cross Health Package. Write for Health Package to 408 Civic Block, Edmonton, Alberta.

DAY AT THE DOMINION EXPERIMENTAL STATION FRIDAY, AUG. 17.

Mr. L. H. Newman, Dominion Cerealist and Mr. Peter Stewart, Secretary, Canadian Seed Growers' Association, both of Ottawa, will be at the Dominion Experimental Station, Lacombe, on this date to discuss problems in connection with the production of registered seed grain. The Experimental Station has some 110 different plots of grain grown from seed submitted by Alberta Seed Growers to the Canadian Seed Growers' Association for verification tests. These will be showing to advantage on this date and will provide very interesting comparisons with respect to purity of variety and type. In addition to this, interesting variety testing, plant breeding and Elite Stock Seed Production experiments will be available for observation and discussion. Come and bring any of your friends who are interested in the production of registered seed grain.

—F. H. Reed, Superintendent.

Miss Freda Forsyth, of Consort, teacher at Sunny Brea School, has had the misfortune to lose her mother who passed away at her home last week. On account of the death of Miss Forsyth's mother she has notified the school authorities that she will not be able to resume her duties after the holidays.

NEWS ITEMS FROM KINSELLA

Mr. George Hippenon of Irma shipped a variety of cattle east on Saturday night.

Mr. and Mrs. Fred Higginson and Mr. and Mrs. Seton and son of Irma spent Sunday at Irma with Mr. and Mrs. Ross Eaton.

Mr. and Mrs. William Anderson were at Clarke Manor Sunday afternoon.

Mr. and Mrs. Haight and Mr. Webster of Tacoma Wash. visited Mr. and Mrs. William Rees last week.

Miss Eileen Neal is visiting her grandparents at Vermillion.

Mrs. and daughter Thelma are in Edmonton.

Mrs. McKee and daughter Christie returned from Edmonton last week.

Mr. and Mrs. Percy Jones and children of Irma called on Mr. and Mrs. Ross Eaton Sunday evening.

Mr. and Mrs. R. Cairns of Edmonton are spending the holidays with Mr. and Mrs. R. Cormack.

Mr. Bert Cormack started cutting wheat on August 1st.

ADENOIDS

During the summer months, the symptoms caused by adenoids are not noticeable as in winter. They are referred to now because this is an opportune time for having them attended to.

Adenoids are tumor-like growths that develop in the passage between the nose and throat. Very young children may have adenoids. The majority of cases occur in children from eighteen months to six years of age.

The presence of adenoids usually causes what is apparently a chronic cold in the head, with a great deal of discharge from the nose. These symptoms, with snuffles, occur during the winter season. Cough is frequently associated with the condition.

If the growths are large, the child will be a mouth-breather, breathing through the mouth day or night, because the natural breathing space through the nose is blocked. This gives rise to snoring.

In advanced cases, the child has a characteristic appearance of the face. The open mouth gives a stupid expression, the nostrils are small and pinched, the upper lip is thickened. The voice may have a nasal twang. The hearing may be impaired. Bad-wetted may be part of the symptoms.

Complete removal is the only treatment for adenoids of any severity.

Parents who have been advised by their physician to have an adenoid condition corrected in a child should do so. Parents of children who show evidence of adenoids, as described, should have the children examined to find out the condition. The treatment of such condition is advised because it interferes with the normal development of the child, lowers his level of physical fitness and, if severe, results in a permanent deformity of the mouth and face.

Questions concerning Health, addressed to the Canadian Medical Association, 184 College Street, Toronto, will be answered by letter. Questions as to diagnosis and treatment will not be answered.

NOTICE

IN THE ESTATE OF CHARLES RAY REED, late of the Village of Irma, in the Province of Alberta, Farmer.

NOTICE is hereby given that all persons having claims upon the estate of the above named Charles Ray Reed who died on or about the 29th day of May, A. D. 1928 are required to file with Olive Geraldine Reed, Executrix of the said estate at Irma, Alberta, by Friday the 13th day of September, A. D. 1928 a full statement duly verified of their claims and that after that date the Executrix will distribute the assets of the deceased's estate among those entitled thereto having regard only to claims of which notice has been so filed and brought to the knowledge of the Executrix of the said estate.

Dated at Viking, Alberta, this 26th day of July, A. D. 1928.
C. G. Parvis, Solicitor for Executrix.

The members and families of the Irma United Church choir held a picnic in Buffalo Park Thursday afternoon, when everybody appeared to have a very enjoyable time.

LANGHAM.—Rev. and Mrs. George H. Elliott and children left Thursday morning for Chamberlain, Sask., where Mr. Elliott has been appointed minister to the United congregation. Mr. Elliott preached his farewell sermon Sunday when the church was packed to the doors. The Masonic brethren of Langham attended in a body as Mr. Elliott had been associated with the lodge as chaplain. Prior to their departure Mrs. Elliott had been made the recipient of a gift of a fish by the C. G. I. T., the formation of which group she had been largely responsible for. The church board of managers presented Mr. Elliott with a cheque during their two years residence at Langham, Mr. and Mrs. Elliott had made a host of friends and their departure is sincerely regretted by the congregation.

On Thursday afternoon August 9th the home of Mrs. Adams of Roseberry was enlivened by a party of ladies, and one lone man, who met in honor of Mrs. Lewis and Miss Lewis who are about to leave the Clarke Manor district.

Mrs. and Miss Lewis have just returned from a short trip through the beauty spots of the Western States and Canada. Both are lovers of nature and both have excellent descriptive powers and as they told of mountains and lakes, of parks and geysers, of cascades and rippling brooks, of big trees, petrified forests and shady rustic "camp" country, rivaled in the landscape and forgot that it was ninety in the shade.

The ladies brought the most delicious refreshments. Mrs. Taylor poured tea after which she presented, on behalf of those assembled, a jardiniere to Mrs. Lewis and a tea set to Miss Lewis.

Mrs. and Miss Lewis suitably responded and said they were sorry to leave Clarke Manor but were glad that they were not going so far away that they could not return often.

CHEVROLET TRUCK HAS IMPROVEMENTS

The Chevrolet Motor Company of Canada announce this week the addition to its line of a new utility truck. The new truck, which embodies several improvements, chief of them "four speeds forward" transmission, four wheel brakes and channel steel bumper, went into production in the various Chevrolet plants recently. It will be on view this week in dealers showrooms throughout the country.

The four-speed transmission will insure a more efficient application of engine power. The extra low speed gear provides maximum pulling power on bad roads and steep grades while normal driving requirements are met as usual with second, third and fourth speeds. Starting strain on the motor is reduced to a minimum. A power take-off port, to which various power devices can be applied, is a further feature of the transmission.

The four-wheel brakes are non-locking and supply a total of 317 square inches of braking, aside from an entirely separate and independently operated set of emergency brakes on the rear wheels. The front wheel brakes are of the internal expanding type, the rear wheel service brake regardless of grade or speed.

A new loading height, 41 inches from the ground, is made possible by a special "kick-up" feature of the long chassis. An unusually long frame support, extending behind the centre of the rear axle, assures proper load distribution.

Rigorous and exacting tests, covering thousands of miles over all types of roads under winter and summer to a new truck at General Motors Proving Ground before the Chevrolet engineering division approved of it for production.

SMOOTHNESS and ENDURANCE never before known at the price

WITH its sound basic design and its background of scientific development on General Motors Proving Ground—with its production advantages provided by the vast facilities of General Motors with its score of engineering advancements, including the famous G-M-R cylinder head—

—Pontiac Six offers a combination of smooth six-cylinder performance and high-speed endurance, the equal of which is found in no other car in the world selling for so low a price.

Its smooth, silent performance, combined with the beauty and luxury of its Fisher bodies, provides a measure of owner satisfaction unequalled in its field. And its tremendous endurance results in unparalleled length of life, which in turn, is expressed in consistently high resale value.

More important reasons for the selection of any car have never been found. That's why ever-increasing thousands are choosing the Pontiac Six . . . why Pontiac sales for 1928 are far ahead of previous records.

Ask your dealer about the G.M.A.C. Deferred Payment Plan which makes buying easy.

A. DUPRE, WAINWRIGHT

PONTIAC SIX

PRODUCT OF GENERAL MOTORS OF CANADA, LIMITED

CLOSED SEASON WILL CONTINUE ON PARTRIDGE

Continuation for 1928 of the closed season on grouse, prairie chicken and partridge is announced in the 1928 game regulations, just issued by the provincial game guardian.

The open season on Hungarian partridge is also reduced from three to two months. It opens this year on October 1st, (two weeks later than last year), and closes November 30th, (two weeks earlier than last year). The bag limit is the same—15 per day; 75 per season.

This year, the Clearwater and Athabasca rivers has been made a dividing line for the open season on ducks and geese. North of this line, the season opens September 1st, and closes December 14th; south of the line, the season opens two weeks later, on September 15th, and closes December 14th.

The bag limit is the same as last year—30 ducks per day; 200 per season; 15 geese per day.

Big game hunting opens as before September 1, one (male) mountain sheep, and one mountain goat, being the bag limit for the season, which ends October 31st.

Deer, moose and caribou (one male deer or moose, and one caribou, bag limit), may be hunted from November 1 to December 14.

Bear Season Opening

The open season on bear is limited to three male animals only, the open season being from September 1, to June 15. Females with cubs, and cubs, may not be shot.

The open seasons on fox, mink, fisher, marten, otter and muskrat remain the same as last year—fox, November 1st to February 28th; mink, muskrat and fisher, November 1st to March 31st; otter, November 1, to April 30; muskrat (north of township 90) March 1st to May 15th; between north Saskatchewan river and township 91, March 1st to April 30th; south of the north Saskatchewan river, closed all year.

AUGUST "ROD AND GUN AND CANADIAN SILVER FOX NEWS"

The August issue of "Rod and Gun and Canadian Silver Fox News," which is just published, contains a highly interesting collection of yarns and stories of outdoor Canada and hunting and fishing. In the list there is a very good story of a more unusual humorous type in "So This is Moose Hunting" by John Richmond. The contents also include several articles of a conservation note, as well as useful information for hunters, fishermen and campers.

The Guns and Ammunition department, edited by C. S. Landis, includes much useful material for the gun crank, while angler, outdoorsman, campers and dogmen are well catered to in the special departments edited by well known authorities. The Canadian Silver Fox News section contains a very complete report of the annual meeting of the Canadian National Silver Fox Breeders' Association.

"Rod and Gun and Canadian Silver Fox News" is published monthly by W. J. Taylor Limited, Woodstock, Ontario.

Always Reliable — Sold by all Grocers

A Great Achievement

Keen interest has been aroused in all parts of Canada by the announcement made at Victoria, recently, by Sir Henry Thornton, President of the Canadian National Railways, that, as a result of some years of study and work a plan will be submitted to the Government and Parliament in the very near future providing for the financial reconstruction of the national system of railways, a plan which, in the words of the C.N.R. president, "will, in perpetuity, relieve the C.N.R. from being any further drag upon the treasury of Canada."

As a matter of fact, the financial reconstruction of the Canadian National Railways has been proceeding apace for some years past through the making of amicable arrangements with stockholders and bondholders of several of the railways now incorporated in the national system. These arrangements were a necessary preliminary step to a final consideration and development of a plan whereby the system could be relieved of the huge burden imposed upon it by reason of its heavy over-capitalization.

In considering the Canadian National Railways, it is always to be remembered that it was not constructed, like the Canadian Pacific, as one operating unit. On the contrary, it is the result of the amalgamation of several different systems, with lines often duplicating each other in the same territory, with duplicate sets of shops, round houses, stations, and other equipment. Thousands of miles of the system were built not for purely commercial reasons, but as a feature of national policy for the opening up, colonization, and national development of the Dominion. Some portions were located for strategic national reasons rather than from the standpoint of the business to be secured or developed.

Under the circumstances, it was not surprising, but rather to be expected, that such mileage would be operated at a deficit. Year by year these deficits have been charged up against the lines which ultimately became part and parcel of the present Canadian National Railways. These individual systems were, in reality, bankrupt when the Government was compelled to take them over to prevent a catastrophe and financial disaster which would have shaken the Dominion and all but ruined its credit in the money markets of the world. Had these railways remained in private ownership and passed into receiverships, there would have been a drastic writing down of capitalization and holders of the stocks and bonds would have had to take their losses, while the Dominion itself would have lost all the many millions loaned to them.

It has long been foreseen that, if the Canadian National Railways were ever to earn sufficient revenues to meet interest charges on its capitalization, the financial structure of the system would have to be reconstructed so as to more nearly bear relation to the actual physical value of the system as a going concern. But, as already stated, certain arrangements with the stock and bond holders of the old railways had to be negotiated if Canada was to escape the stigma of having broken faith with these investors and the accusation of being guilty of a policy amounting almost to repudiation.

Neither Sir Henry Thornton, nor Hon. C. A. Dunning, Minister of Railways, has given any hint of the nature of the proposals to be laid before Parliament, but the people of Canada, as reflected by the editorial expressions of papers on all sides of politics, are decidedly friendly to the development of any reasonable plan which will give the management of the national railways a fair chance to make the system self-supporting and ultimately a profit-making enterprise.

When Sir Henry Thornton, at the request of the Mackenzie King Government, accepted the presidency and management of the Canadian National Railways, it was still in a state of disorganization. From an operating standpoint it had to be completely reorganized. At that time it was not only not earning one cent of interest on its outstanding stocks and bonds, but it was being operated at an actual loss year after year, which loss had to be put up in cold cash out of the Dominion treasury. Next to the war debt of Canada, it was the greatest burden imposed on the Canadian people. The outlook was blue indeed, and many people feared it would bankrupt the Dominion.

Therefore, before any permanent reconstruction of its financial system could be undertaken, it was not only necessary to effect the arrangements already referred to, but even more necessary that these annual losses in operation be stopped. It stands to the credit of Sir Henry Thornton that in this he was markedly successful. Operating deficits ceased some years ago. Within the past two or three years these surpluses have been sufficiently large to meet all interest charges on securities held by the public, leaving a small balance to be applied on the enormous sum owing to the Government itself.

Addressing a meeting in a Saskatchewan town last month, Sir Henry Thornton stated that the surplus this year would be the largest in the history of the system, and that the outlook for the future of the road as a real and very valuable asset of the Dominion was never brighter, and this despite increased wages to employees and lower freight rates imposed by the Railway Commission.

The final and definite financial reconstruction of the whole system, and the resultant establishment of the Canadian National Railways as a self-supporting, publicly-owned transportation utility, will not only give the greatest satisfaction to the taxpayers of Canada, but it will prove a guarantee to the whole world of the financial stability and strength of the Dominion, and be hailed as another great Canadian achievement.

Red River Voyageur Dead

One Of Last Survivors Of Courageous Northern Adventurers

One of the last of the Red River voyageurs, Eli Carriere, 89 years of age, died recently at Winnipeg, following a few weeks illness. Carriere was one of the band of intrepid and courageous men organized by the Hudson's Bay Company to direct the

League Is Fighting Illicit Drug Traffic

New International Convention Goes Into Effect In September

A general world-wide tightening-up of the illicit "dope" traffic is scheduled to take place when the League's new international opium and harmful drugs convention goes into effect on Sept. 25th.

Although the convention was launched in 1923, provisions were made that it could only become effective when ratified by at least 10 states of which seven must be members of the League council including two permanent members.

To date the convention has been ratified or adhered to by nearly 30 states but it was only Canada's recent ratification that gave the necessary number of council members.

THE UNTOUCHED MEAL

People Who Go Hungry With Food On The Table

"I simply cannot eat." Actual tragedy is suggested by these simple words, so often heard, because loss of appetite is the beginning of trouble that sooner or later reveals itself as indigestion, nervous dyspepsia, with violent headaches and other serious symptoms. Loss of appetite, whether a man or woman, is a symptom you dare not ignore. If you do, much suffering is sure to follow.

The secret of a good appetite, the secret of keeping well—is to keep up the quality of the blood. Dr. Williams' Pink Pills supply strength to the enfeebled organs of digestion, and enable them to digest thoroughly the food eaten without causing pain or distress. Proof of this is given by Mr. William H. Kelly, Kingston, Ont., who says:—"I cannot recommend Dr. Williams' Pink Pills too highly. I had been bothered with indigestion in a chronic form for almost ten years. Everything I would eat would turn sour. I felt as though there was a big ball in my stomach all the time. I felt tired and weak and would often turn dizzy. I doctored and tried many medicines, spending many, many dollars, but to no avail. One day I heard a lady praising Dr. Williams' Pink Pills and I decided to try them. I am more than glad I did, for soon I found relief, and after taking four pills for a couple of months the trouble had disappeared, and now I can eat all kinds of food and have again my old time health and strength."

Send For These Health Books. "Building Up the Blood," and "What To Eat and How To Eat," will be sent free by The Dr. Williams' Medicine Co., Brockville, Ont., if you mention this paper.

Dr. Williams' Pink Pills are sold by all dealers in medicine or you can get by mail for 50 cents per box.

First Woman Air Pilot

Lady Heath Employed By Royal Dutch Air Lines

Lady Heath, noted British air woman, has been engaged by the Royal Dutch Air Lines, as a pilot for the passenger air service. She is the first woman to be so employed.

Lady Heath, the former Mrs. Elliott Lynn, is the wife of Sir James Heath, ironmaster and committee proprietor. She arrived at Croydon on May 17, from Cape Town, South Africa. Completing a 10,000 mile solo flight starting in February, she was the first woman to fly the length of the African continent.

For Sores Or Burns.—Dr. Thomas' Electric Oil is a standard remedy for the prompt treatment of sores and burns. Its healing power quickly soothes the pain and aids a speedy recovery from the injury. It is an excellent remedy for all manner of cuts, bruises and sprains, as well as for relieving the pains arising from inflammation of various kinds. A bottle in the house and stable saves many a doctor's and veterinary's fee.

The wood of the balsam fir is very light in color, and, being odorless, is very suitable for boxes intended for packing food materials.

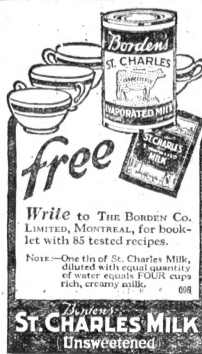

SUMMER COMPLAINT Nearly Lost Her Little Girl

Mrs. Theodore Rivett, Anthony, Ont., writes:—"Last Fall I nearly lost my little girl as she was suffering terribly from summer complaint. She became very thin and weak; had no appetite, and could hardly walk across the room without falling down. At last my mother advised me to get a bottle of

and after she had taken a few doses she was relieved. I also found it a grand remedy for cramps, and would not be without a bottle of it in the house for anything."

Has been on the market for over 50 years; put up only by The T. Milburn Co., Limited, Toronto, Ont.

Write to The Borden Co. Limited, Montreal, for booklet with 50 tested recipes.

Note—One tin of St. Charles Milk, diluted with equal quantity of water equals FOUR cups rich cream milk.

St. Charles Milk Unsweetened

Recipes For This Week

(By Betty Barclay)

SCALLOPED EGGS AND CHEESE

- 1 egg.
- 1 cup grated cheese.
- 1 cup soft bread crumbs.
- 1 teaspoon salt.
- 1 cup white sauce.
- Few grains cayenne.

Break the egg into a buttered baking dish and cook in hot oven until they begin to turn white around the edges. Then cover eggs with white sauce, and over this the mixture of crumbs, cheese and seasonings. Brown in very hot oven, so eggs will not be overcooked by time cheese is brown.

ROLY-POLY

- 2 cups flour.
- 4 teaspoons baking-powder.
- 1 teaspoon salt.
- 4 tablespoons butter.
- 1 cup milk, scald.
- 1 cup sugar.
- 4 oranges.
- Grated rind 1 orange.
- 1 cup water.

Mix and sift flour, baking-powder, and salt. With tips of fingers rub in 4 tablespoons butter, and mix to a dough with milk. Roll out one-half inch thick, and cover with small pieces of orange pulp. Mix sugar, orange rind, and remaining butter, and sprinkle two-thirds of it over the orange. Roll up; pinch ends together; place in baking-dish; sprinkle with remaining sugar; surround with water, and bake about thirty minutes. Serve with an orange or lemon sauce.

Miller's Worm Powders are a prompt relief from the attacks of worms in children. They are powerful in their action and while leaving nothing to be desired as a worm expellant, have an invigorating effect upon the youthful system, remedying fever, biliousness, loss of appetite, sleeplessness, and other ailments that follow disorders caused by worms in the stomach and bowels.

Small Thing To Look For

But Twenty-Fifth Billionth Of Inch Means Much To Astronomers

Measurements equivalent to the one-25,000,000,000th of an inch have been made by Charles E. St. John, of Mount Wilson Observatory, in researches to prove the contention of Professor Einstein, that a ray of light is "bent" when it passes a gravitational field, such as the sun. Professor Frost of the Yerke Observatory, explains that the amount of displacement sought and found by Mr. St. John is very minute, being a trifle less than one twenty-fifth billionth of an inch. It was a small thing to look for but a big thing to find, because it presents another proof of the Einstein theory in regard to light rays.

Only the uninformed endure the agony of corns. The knowing ones apply Holloway's Corn Remover and get relief.

To Represent Canada

Canadians To Attend International Fuel Conference In London

Edgar Stansfield, research engineer, scientific and industrial research council of Alberta and B. J. Haanel, chief engineer, division of fuel and fuel testing department of mines, Ottawa, will represent Canada at the international fuel conference to be held in London, England, Sept. 24 to Oct. 6. The conference is to be held under the auspices of the world power conference at the Imperial Institute. Some 22 countries will be represented.

It is expected that extensions of railway lines in the Peace River country, Northern Alberta, will be completed in time to handle the 1923 crop shipments, which promises to exceed all previous records.

Minard's Liniment — the Universal Remedy.

Much Like Human Beings

Fish Have Same Aliments and Require Lots Of Exercise

"Fish are very much like human beings. People who have them for pets should realize this and give them some consideration," says Miss Ida M. Mellen, America's only woman fish doctor.

"Fish suffer from much the same ailments that the human species do and they cannot exist if their conditions of life are uncomfortable."

"We learn a lot about people from fish. Take the matter of exercise. If fish get lazy and won't exercise, they get sick. To remedy this at the New York Aquarium, we give them a change of scenery: You would be surprised how a more attractive swimming ground and an extra amount of sunlight arouses their enthusiasm."

"If fish eat too much of the wrong food, they get indigestion just like humans. And, like humans, they hate to take castor oil. I have had fish hold it in their mouths and spit it out later, rather than swallow it. We have to watch them just like children to see that they get their medicine."

"An excellent motto to make sure your pet fish has good care is, 'Try to imagine yourself in his place. That makes you think.'"

Would Be Sensible Law

Motor Brakes Should Have To Pass Certified Tests Regularly

It is strongly suggested that the time is coming in the near future when brakes must be tested and certified regularly; and the careful motorist will make no objection.

When it is remembered that 800,000 people were killed or injured in automobile accidents in the United States alone last year and the fact that faulty brakes cause a majority of all accidents, the need for such a law may be realized. It is the height of folly to drive with faulty brakes.

The Terrible Of Asthma comes like a thief in the night with its dreadful throttling, robbing its victim of breath. It seems beyond the power of human aid to relieve until one tries the remedy of Dr. J. D. Kellogg's Asthma Remedy. Then relief comes with a rush. Life becomes worth living, and if the remedy be used persistently, the disease is put permanently to rout. Take no substitute.

Quite Possible

"The evening wore on," continued the man who was telling the story. "Excuse me," interrupted the would-be wit, "but can you tell me what the evening wore on that occasion?"

"I don't know that it is important," replied the story-teller, quite unperturbed. "If you must know, however, I believe it was the close of a spring day."

For every dollar Canadian tourists spent in the United States in 1927, American tourists spent four dollars in Canada. It is said.

CUTICURA

Best For Both Mother And Child

Regular use of the Soap, assisted by the Ointment when required, not only cleanses and purifies the skin of children and adults, but tends to prevent clogging of the pores; the common cause of pimples and other unsightly conditions.

HERCULES

PERMANENT BUILDING PAPER

MR. THINKER—

here's your health

Most of your clients are thinkers. A few facts regarding Hercules will impress them. Hercules—in three grades, X, XX, XXX—is tested and proven wind proof and damp proof. A little thought will show them that this is all a building paper should be.

And above all, by these very qualities, Hercules becomes the protection of the most precious treasures of the occupants of any home—their health.

A sample of Hercules is yours for the asking.

Appleford Paper Products

HAMILTON, CANADA

We Need Forcibly Reminding Of The High Position Achieved By Canada In Recent Years

"We have been so dazzled by reports of the wealth and prosperity of the United States," comments The Daily Sketch, "that we need to be forcibly reminded of the position achieved by Uncle Sam's neighbor."

This was called forth by statements made by Hon. P. C. Larkin, Canadian High Commissioner in Great Britain, on the occasion of the Dominion's sixty-first birthday, to the effect that Canadians were the most prosperous and the lightest taxed people in the world today, not excluding Americans.

The Daily Sketch uses the correct word, and it is applicable to many Canadians as well as to people of other countries. The prosperity of the United States has indeed us to a full realization of our own enviable position, although economists state that a very small percentage of United States industry does business at a profit. Tax reductions at Washington have given us a false impression and blinded us to the fact that we are less heavily taxed, considering State, municipal and other forms of taxation of which we know comparatively little.

The comparison is not to the discredit of the United States. Its spectacular progress has been dazzling. We have been at fault to the extent that we have permitted it to distract attention away from the advancement we have made, are still making, and are due to make in coming decades. It is gratifying, however, that now we have many friends at the court of public opinion ready to proclaim the greatness of the country. Newspapers and other periodicals at home and abroad are giving more space to the Dominion's achievements, and are finding co-operation from men high in finance, industry, mining, agriculture, transportation and general business. A notable recent example of this is a supplement issued by The Manchester Guardian devoted to "Commercial and Industrial Canada."

Mr. Larkin pointed out in an interview in The Daily Express, that according to estimates, 60 per cent. of Canadians living in cities own their own homes. This is a unique position, indicating both prosperity and stability. The cities and towns have entered an era of big business, their net production in 1925 being estimated at \$2,000,000,000. They are contributing their share to \$2,500,000,000 of trade, with 110 countries, as compared with \$610,000,000 twenty years ago with 65 countries. The agricultural wealth of the Dominion six years ago was \$6,700,000,000, and the gross agricultural revenue \$1,350,000,000. Last year the former was \$7,950,000,000 and the latter \$1,735,000,000. The United States, cannot show so large a percentage of home owners in the city, or so large a net revenue per acre of land cultivated in the country.

The Dominion's wheat crop exceeds \$300,000,000 in value yearly. The revenue from forest products is approximately half a billion dollars. The mineral output is half as much, double what it was fifteen years ago. Canada stands third among the nations of the world in gold production. It is also third in the per capita use of electrical energy. It is fifth as a manufacturing country with a population of less than 10,000,000. Would it be too much to say that if other countries have been dazzled by the progress of the United States, that country has been dazzled by the prospects awaiting here? In 1913 United States investments in Canada aggregated \$417,000,000; in 1927 they totalled about \$3,000,000,000, more than half of total investment by foreign capital, including that from the United Kingdom.

This is a fact for Britishers and Canadians to keep in mind.—Toronto Globe.

No man is ever so friendless that he can't find some one to jolly him along.

"I intend to steal a kiss!" — Pages Cales, Yverdon.

W. N. U. 1745

LABOR ENDED

Bishop Pinckham, 40 years old, Canadian High Commissioner in Great Britain, on the occasion of the Dominion's sixty-first birthday, to the effect that Canadians were the most prosperous and the lightest taxed people in the world today, not excluding Americans.

Experiments With Fertilizer

Superphosphate From Trail Smelters Being Tried Out On Prairies

Experiments to test the value of superphosphates fertilizer for the west are being conducted in all three of the prairie provinces this summer. The provincial governments' field crops branches co-operating with the provincial universities. The superphosphate is being supplied by the smelters of Trail, B.C., where it is a by-product from the mining and smelting industry. The Massey-Harris Company is supplying three drills for each province to work with. These drills are equipped so that they sow the grain and the fertilizer at the same time.

Winnipeg Newspaper Union

Attractive and Practical

An attractive apron that slips over the head with wide straps that will not slip off, the shoulders is shown in design No. 418. You'll find it especially easy to make, as it cuts entirely in one-piece. Printed sateen, English prints, chintz, plain gingham, and striped percale are smart suggestions. Pattern is furnished in sizes 36, 40 and 44 inches bust measure. The 46-inch size requires 7 1/2 yards of binding. Price 25 cents the pattern.

Our Fashion Book, illustrating the newest and most practical styles, will be of interest to every home dress-maker. Price of the book 10 cents the copy.

Europe Studies Canada

Rumanian Delegation Comes To Canada To Study Method Of Handling Grain

A Rumanian delegation of eight has recently reached Canada for the purpose of studying the system of wheat standardization adopted in this country, with the hope that it may be applied to Rumania. The delegation, who have been sent by the Rumanian Government, will visit the wheat fields in Western Canada and follow the grain from the time it is cut on the prairies through its various stages until it is shipped from Montreal or Quebec on out-going steamers. The system of grain handling at Vancouver may also be inspected.

Canada's rapid rise to the position of being the greatest wheat-producing country in the world is attracting wide-spread attention to the system adopted in the Dominion for handling, grading, and marketing wheat.

Hens Sell For \$16.66 Each

Japanese Government Places Large Order For Live Poultry From B.C.

After an experimental purchase last year the Japanese Government has just placed a large order for British Columbia live poultry to be shipped to Japan. It is claimed that no other poultry-breeding centre in the world could have filled such an order at this season or have supplied birds of such quality. Principal breeds are White Leghorns, Barred Rocks, Rhode Island Reds and White Wyandottes.

The shipment is part of a 10-year program and is a direct result of the World's Poultry Congress at Ottawaya, where the B.C. poultry men last year. It consists of 300 birds with an aggregate value of \$5,000, an average price of \$16.66.

Stepping Stone To Success

No Shame In Failure When Best Has Been Done

The news has once more told of tragedies among pupils who have failed in school.

Do not smile at them. They are very serious in the homes where they occur.

And the worst of it is that the failure is often in the teaching, not in the pupils.

There should be no shame in failure where one has done one's best. The right way to look at failures is as stepping stones to success. For every success has failures behind it. Success consists of being right a majority of the times. Just a fraction over 50 per cent. is enough to swing the balance in grown-up life. It is a pity that the young cannot be philosophical.

Considerate To The Aged

I know of no city so considerate of the aged as New York. Newspapers will pause in their work to escort old men and women across the street. Traffic cops leave their posts at the first show of bewilderment on the part of aged pedestrians. Head waiters in cafes will almost invariably give elderly couples choice tables and even tapstubs hat-matches look the other way when delivering their hats or wraps. It is rather pleasant to be old in New York.

Experience is the only teacher that can get anything into the head of the man who knows it all.

He who marries well marries neither his inferior nor his superior.

Deputy Minister Of Fisheries

W. A. Found has recently been appointed as the new deputy minister of fisheries. Formerly he was director of fisheries until the government decided to establish a separate department. The new department will continue under the direction of Hon. H. J. A. Canada minister of marine and fisheries. The work of the marine branch has greatly increased since the advent of radio.

Mange In Swine

Mixture Of Raw Lined Oil, Tar Oil And Sulphur An Effective Remedy

A skin disease, scroptic mange, has appeared from time to time in some parts of the country. It is indicated by unthriftness, dryness of the skin, accompanied by continuous rubbing or scratching. In advanced cases rubbing is sometimes continued until the blood appears. The disease is confined almost entirely to the summer season. The Scott, Saskatchewan, Experimental Station had occasion to deal with this disease, and from their experience can recommend a mixture of raw lined oil, tar oil, and sulphur, prepared by having one gallon of raw oil by suspension in hot water and adding to this eight ounces of oil of tar and two pounds of sulphur, stirred in while the oil is hot. This preparation is applied warm by the use of a rag to all parts of the body. The rag is merely moistened with the mixture to avoid blistering. Four treatments at ten-day intervals effect a cure. Between the third and fourth treatment the pens were thoroughly cleaned out, and the walls and floors sprayed with whitewash containing a reliable disinfectant. Referring to these experiments in the 1927 report of the Scott Experimental Station, the superintendent states that it is not necessary to whitewash the walls higher than six feet from the floor.

Turkey Scraps Old Titles

New Turkey has decided to scrap all the old official titles left over from the old regime beginning with the highest military title "Pasha" which henceforth will be "General." President Mustafa Kemal's name will thus be Westernized to General Ghazi Mustafa Kemal instead of the old form Mustafa Kemal Pasha.

No Glamour In War

The romantic and the poet may still strive desperately to keep up the old glamour which surrounded the business of fighting. But it is not there, and they know it. There is no "shining armor" left in modern war; only mud and blood and a dulling of office work.

LE FOULON

The fete of St. Jean Baptiste is a day of particular celebration among the French-Canadians and although weather intervened in the program, one of the most impressive spectacles was eventually presented in Montreal in which many thousands participated. "Jean le Percuteur" was the title of the oratorio given in the Montreal Stadium, which was preceded by a procession of floats representing various well known French-Canadian folk songs. The float pictured above is entitled "Le Fouillon," and was the contribution of the Canadian Pacific Railway towards this popular event. It illustrates the old chanson of that name, sung by the inhabitants in the manufacture of homespun material during the process of shrinking. The singers are the Bytown Troubadours, who made such a hit at the Quebec Folk Song Festival.

Development Of Hardy Fruits For The Western Prairies Is Meeting With Good Success

WESTERN SHEEPMEN IN STRONG POSITION

Permanent Feeling Of Confidence Everywhere In Evidence

"Never have I noticed such a permanent feeling of confidence as seems to exist among sheepmen all through the Western Provinces this year," states W. H. J. Tisdale, of the Canadian Co-operative Wool Growers, who has just returned from his sixth annual western tour, during which he motored all through the principal range areas of British Columbia and Southern Alberta, as well as visiting practically the whole of the sheep farming areas of all four provinces. "Not only are the sheepmen confident, but I found the same feeling in respect to agriculture generally among the leading banking and railway officials of the towns and cities. Good crops and good prices have had a wonderful effect on prairie and British Columbia conditions, and live stock is coming back rapidly."

Mr. Tisdale reported a continuing trend toward mixed farming. Sheep are now considered to work in well with grain farming, where the property has been fenced. From 100 to 150 ewes are being kept on many half sections where, owing to the abundance of waste feed, their feeding cost is very small. The sheep have been found very useful in keeping summer fallows clean and in helping to solve the weed problem.

"Undoubtedly the most spectacular sheep development has taken place in British Columbia. There, farmers have doubled their sheep population in the past four years, and the Grazing Commission, T. P. McKenzie, assured me that there was room for 2,000,000 sheep, or more than fifty per cent. of the present total for all Canada, in the interior of his province alone."

"Unfortunately, according to this official of the Canadian Co-operative, the range lamb crop of the west this year, due to extreme weather conditions at breeding time last fall did not run over 55 per cent. but among the farm flocks of the west it was well up to average. The wool coming from this part of the country this year is as good as any western clip he has ever seen, being clean and bright. Of the total western clip, the Co-operative expects to handle about 300,000 pounds from British Columbia, 750,000 pounds from the flocks of Saskatchewan and Manitoba, and 1,250,000 pounds from Alberta this season."

Heavy Marketing Of Veal Calves

Sale Last Year Heaviest In Past Five Years

The increase in the dairy cattle population as in straight milk production is invariably followed by an increased marketing of light veal. Last year the sale of calves was the heaviest during the past five years and showed an increase since 1923 of approximately 118,000 head. In a report just issued by the Department of Agriculture, at Ottawa, on the "Origin and Quality Of Commercial Cattle Marketed in Canada Last Year," the quality of the calves as a whole was disappointing, there being a preponderance of "greasers" and a large percentage of very common veal stock. The report, which is distributed by the Publications Branch of the Department, shows by counties or electoral districts within provinces, where the calves came from, the market classes to which they belong, and their destination. It also deals with other classes of market stock, including cattle, sheep, and hogs marketed throughout the Dominion in 1927.

Hundred Million Miles Of Wire

It requires 100,000,000 miles of wire to run the world's telephones. Of this wire mileage some 68,000,000 are found in North America. Germany with 10,000,000 has the second greatest mileage, and Great Britain comes third with 7,000,000. Canada with 3,500,000 is fourth.

To Be Continued

Little Emily had been to school for the first time. "Well, darling, and what did you learn?" asked her mother on Emily's return. "Nuffin," sighed Emily, hopelessly. "I've got to go back tomorrow."

As the earth's crust is by no means rigid it rises and falls under the gravitational attraction of the moon and sun in a manner similar to that of the ocean's tide.

There are few districts in Canada where finer vegetables can be grown than in the Prairie Provinces provided the garden is well protected from the strong winds. The same thing applies to small fruits such as currants and raspberries where proper cultural methods are employed. The growing of tree fruits is however, a much more recent development. While it is not expected that apples and plums will for many years be raised in commercial quantities on the prairies there is enough evidence to define, quite conclusively that in most of the settled sections it is quite possible for a farmer to raise sufficient fruit for home requirements.

The late A. P. Stevenson, of Morden, Manitoba, undoubtedly did more than any other private experimenter in demonstrating the possibility of growing tree fruits in Manitoba. He propagated and sold large numbers of young trees of varieties which he found hardy, mostly of Russian origin, and of recent years reports of planters ripening standard apples have been received from widely separated points in the three prairie provinces.

On the Dominion Government's nursery station at Indian Head, apples and plums originating from the Stevenson nursery were planted nearly twenty years ago and additions made from time to time. Reasonable crops of fruit have been secured quite regularly. In some seasons over 1,500 pounds of plums and 1,700 pounds of standard apples have been picked. The apples which have given most general satisfaction are the Hibernia, Blushed Chablis and Patten's Greening; while among the best plums are Altink, Stevenson's Mammoth, Cheney, and Winnipeg. One of the chief difficulties to contend with is rabbit injury, and it is doubtful whether success can be secured unless the trees are protected by a rabbit-proof fence. A good stand-broke of trees is absolutely essential.

Conditions for fruit growing are not equally favorable all over the three provinces. Varieties which are hardy in southern Manitoba and southeastern Saskatchewan are not found to be hardy in areas farther north and west. It is safe to predict, however, that by cross-breeding, varieties will eventually be produced suitable to all districts. It is only of comparatively recent years that much attention has been paid to the breeding of hardy fruits for the Canadian prairies, but a great deal of work along these lines is now being carried on under the supervision of Mr. W. T. Macoun, Dominion Horticulturist, Ottawa, at the Dominion Experimental Farms, at Morden, Man. and Rosthern, Sask., also at the University of Saskatchewan, at Saskatoon, and results so far are very encouraging.

A Dry Land Fish Pool

Pool Being Arranged In Manitoba For Marketing Fish

A new kind of fish pool, which operates on dry land, is being organized in Manitoba. It is modelled somewhat on the famous Canadian Wharf Pool and has for its purpose the marketing of the fish catch from the Great Lakes of Manitoba.

Manitoba's whitelish, pickerel, jackfish and tullibees are highly esteemed in the fashionable homes and restaurants of New York, Chicago, Boston, Philadelphia and other American cities, but at the present time a very small fraction of the price paid by the consumer reaches the man who gathers the harvest of the deep. The promoters of the Fish Pool hope to increase the returns to the producer without increasing the cost of the ultimate consumer.

Most of man's troubles are due to the fact that he does not keep enough of his thoughts to himself.

The average man is seldom willing to do the things he is constantly telling others to do.

"Don't fall into the pit! The seats there cost a mark!" Lustige Koller Zeitung, Cologne.

Announcing the NEW UTILITY TRUCK

-another Sensational Chevrolet Value
4 Speeds Forward • 4 Wheel Brakes

NOW Chevrolet presents the New Utility Truck—a low-priced haulage unit embodying every feature of advanced engineering developed through years of experience in commercial car-building and proved by exhaustive testing on the General Motors proving ground!

Typical of the progressive design embodied in this sensational new truck are a four-speed forward transmission, powerful non-locking four-wheel brakes, full ball-bearing steering mechanism, front shock absorber springs, air-bound seat cushions and channel front bumper. In addition, it offers all those basic features which have been so largely instrumental in Chevrolet's tremendous success as the world's largest builder of trucks—rugged rear axle with one-piece banjo-type housing . . . semi-elliptic springs set parallel to the load . . . completely enclosed valve-in-head motor with air cleaner, oil filter and positive action vane type oil pump . . . thermostatic control of water circulation . . . low loading height . . . generous road clearance and countless other features of comparable importance.

Visit your Chevrolet dealer and get a trial-load demonstration of this remarkable new truck! It has been developed to meet the modern conditions of business transportation and body types are available for every type of business.

Curves instead of straight lines—that's the latest in automobile fashions, illustrated by these 1929 McLaughlin-Buicks, just introduced. At the left, young Canada, as personified by three youthful inhabitants of McLaughlin-Buick's home city of Oshawa, marvels at the massive new radiator. In the centre is the seven-passenger sedan, and above, the sport roadster.

Circle the Globe

1. The Fairchild cabin monoplane "City of New York" with her wings folded at Carlin Field, N.Y., prior to being loaded on a trans-Atlantic liner. 2. John N. Mears and his pilot, C. R. Collier, his dog, mascot that accompanied them in this record dash around the world. 3. The Empress of Russia which carried Mears and Collier across the Pacific with their plane "The City of New York" aboard. She was used by Mears in 1913 when he made his first world record.

Twice now, John Henry Mears has circled the world in record time. On each occasion the Canadian Pacific liner "Empress of Russia" has enabled him to beat all former records. Twenty-three days before his first flight, "The City of New York" landed at Carlin Field, L.I. Mears and his pilot, B. D. Collier, flew 700 miles out to sea and landed aboard the ship that conveyed him to France. Arrived in Europe, he flew from Cherbourg to Yokohama and boarded the "Empress of Russia" at Kobe, where the white liner waited ready to dash across the Pacific to Vancouver. From Vancouver to New York was covered by Mears' monoplane, which he carried with him on board. In his first article Mears prophesied success for himself, and his companion because "the Canadian Pacific liner 'Empress of Russia' brought me luck when I broke the record in 1913 and I look on it as a good omen that she is to help me break the record again." He succeeded in breaking the record even better than expected, the "Empress of Russia" bringing him in a day ahead of schedule, enabling him to hop across the continent in his plane and arrive at Battery Park, New York, 23 days, 15 hours, 21 minutes, and 3 seconds after he had left on his journey eastward. He sent the following telegram to Mr. H. B. Besant, of the Canadian Pacific Steamships at Montreal:—"Collier and I want to express our deep appreciation for the splendid cooperation we have received on our trip across the Pacific on the 'Empress of Russia.' Getting the ship in to Victoria Friday evening ahead of schedule saved us a day and we are deeply grateful."

—International Newsphoto.

Ramsay MacDonald Tours Canada

Group taken aboard the Canadian Pacific liner "Empress of France" on the arrival of the leader of the British Labour Party, J. Ramsay MacDonald and his three daughters, Isabel, Joan and Sheila, for a five-day tour of the Dominion. Left to right: Joan MacDonald, Isabel, youngest member of the L.C.C., Captain Gifford, commander of the "Empress," The Right Hon. J. Ramsay MacDonald, and Sheila. Mr. MacDonald and his daughters will tour Canada, visiting Banff, Lake Louise, Vancouver and other Western points and sail for England in September on the "Empress of Australia."

VIKING

Wm. T. Carlyle, of Edmonton, is the new shipping manager for the Grattan Coulee Live Stock Marketing Association at this point and has taken over the duties of the former shipper Robt. Ash, who is going back to the farm. Mr. Carlyle is a son of S. G. Carlyle, deputy minister.

K. Walker, provincial inspector of weeds, was in town Tuesday conferring with local weed inspectors as to the weed situation. They found several who had neglected giving the weed patches the necessary attention and gave them notice to have the weeds destroyed within twenty four hours.

A. Smith returned from Thorhild, Alberta, on Monday after spending a short time with a sick friend in that neighborhood. Thorhild is about 160 miles north and west of Viking. Mr. Smith made the trip by motor. Thorhild is right in the big game country.

Mrs. Watkins and son Walter and daughter Miss Nora have been visiting at the home of Mr. and Mrs. Steve Jones for a few days. Miss Nora and Walter returned to Calgary on Sunday while Mrs. Watkins will remain here a while longer.

J. L. Small, linotype operator at The News office is enjoying a holiday. He went to Saskatoon on Friday to meet his brother Robt. who was motor ing up from Winnipeg and together they came to Viking.

The Ranfurly girls basketball team will play the Viking team at the local fair grounds next Monday, August 20th, at 7.30 P. M. Everybody turn out and see a real game, as these teams are well matched and know how to play.

Everything points to an early start to cut the 1928 crop. Binders and harvesting machinery in general are being turned up and e'er long they will be humming a fine tune in the fields.

A meeting of the Village Council was held Monday, August 13th, at 8.30 P. M., all councillors being present. The council sat as a court of revision. Only one appeal had been made against assessment and this was disallowed.

After the court of revision the council adjourned and opened the meeting again as a special session to strike a rate of taxation for the current year. After due deliberation it was found that approximately \$5523.25 was needed for expenses during the year 1928, the same being made up as follows:

Debtures \$948.00; gas and lights \$700; caretaker \$720; secretary's salary \$350; Relief 400; Postage and Printing \$125; Public Works \$1500; Insurance \$103.50; Drainage Tax \$101.75; Machinery \$125.00; Maintenance \$150.00; Sundry \$300.00; Total \$5523.25.

In order to raise this amount on the available assessable property in the village, a rate as follows was decided upon: 20 mills for municipal purposes, 7 mills for hospital, 1 mill for supplementary revenue, total village rate 28 mills.

It was further passed that a dis count of five percent for prompt pay ment of current taxes be given if paid on or before November 1st, 1928.

Two lots were sold to the Viking Elks Community Hall Company Limited for \$100.00, the company to pay all expenses in obtaining title to same.

It was further agreed in case the company built a community hall on these lots that the building and lots be exempt from village taxes for a period of five years.

Members of the Horseshoe Club are busy this week fixing a real horseshoe grounds on the agricultural grounds which we understand will be one of the best in this part of the province. Built according to Hoyle they have also purchased international official horseshoes that will be used in the tournament here on fair day.

There are lots of entries in already and it looks like it's going to be a real tournament. Leave your entries with Angus Ross and J. L. Slavik, committee in charge.

About two hundred people gathered in the newly brushed field belonging to B. C. Gilpin ten miles north of town last Thursday evening and witnessed several huge pots of witch denared by the fire demon. The crowd amused themselves by roasting "hot dogs" over the coals, while the host and hostess brewed and served some delicious coffee.

The members of the Elk lodge have organized into teams and are canvassing the town and district in a fund drive to sell shares in the community hall. It is hoped to have the full amount, \$10,000 subscribed before the end of this week. If you haven't been canvassed see some Elk and get your name on the dotted line. Everybody's doing it.

Messrs Angus Ross, Jas. Hennessy J. L. Slavik and H. G. Thumel motored to Wainwright last Wednesday afternoon and took part in the horseshoe tournament which was a feature of the fair program. Ross and Hennessy the old reliable won out in the finals against Pidgeon and Reynolds of Wainwright.

Do Not Neglect Your Eyes!

CUT SOW THISTLE NOW

A little attention immediately to cutting sow thistle will prevent millions of seeds being scattered over your farm and your neighbor's farm. Sow thistle is one of the most pernicious weeds in the province. It has been on the increase. Further increase means loss of hundreds of thousands of dollars. Get it under control and don't wait for the weed inspector to find them for you as it then may be too late. — A. A. Burnham, Weed Inspector, M. D. No. 455.

Sunday School Teachers: Lillian,

where do good little girls go when they die?

Lillian: Heaven.

Teacher: That's right; now tell me

class where the bad girls go?

Lillian: To the depot to see the travelling men come in.

When a girl pays two dollars for a pair of stockings, you can't blame her for showing a dollar and ninety-five cents worth.

Teacher: Norman, give me a sentence using the word diadem.

Pupil: People who drive on to the railroad crossing diadem sight, quicker than those who stop, look and listen than those who stop, look and listen.

FARMERS WEEK AT LACOMBE EXPERIMENTAL STATION

On Monday, Tuesday, Wednesday and Thursday, August 20 to 23, a four day course of lectures and practical demonstrations on Live Stock, Field Crops, Poultry, Horticulture and Beekeeping will be given at the Dominion Experimental Station, Lacombe.

Experts, prominent in each line of work from University at Edmonton, the Provincial Department of Agriculture, Canadian Pacific Railway Department of Natural Resources and the Dominion Live Stock Branch will assist the staff of the experimental Station. Evening addresses will be given by prominent speakers.

VIKING

C. G. Purvis arrived home last Saturday from a six weeks holiday spent at White Rock, B. C. He looks as if the coast climate agreed with him. Mrs. Purvis and son Stewart remained at the coast a few days longer.

Hugh Bosworth was committed for trial on a charge of cattle stealing and selling them to a cattle buyer at a police court hearing before Police Magistrate H. A. Meredith, held last Wednesday.

Mr. and Mrs. Harry Cartwright and son Archie returned last week from a motor trip to St. James, Minnesota, where they had a pleasant visit with relatives and friends.

Hjalmar Fredericksen, Vilmar Hansson and Fritz Blomquist arrived from Sweden and are spending a few days at the Fred Hanson home before going into the local harvest fields.

Miss Mary Slavik enjoyed a few days visit in Edmonton last week.

NURSES know, and doctors have declared there's nothing quite like Aspirin to relieve all sorts of aches and pains, but be sure it is Aspirin the name Bayer should be on the package, and on every tablet. Bayer is genuine, and the word genuine in red is on every box. You can't go wrong if you just look at the box.

CHAPTER XXIX—Continued.

When Helmi returned to the city she went to the hospital for news of Lili, and she went without fear. She had the assurance of Lili's safety, and as she sat in the small, dark waiting room it did not occur to her that she was a lonely girl in a big city, with a sick baby and no money. Helmi was already planning her summer and counting the days until little Lili could go with her.

The nurse who had so kindly received the baby came to speak to her. "Oh, I remember you," she said smiling, "you are looking much happier. I told you she would do well, and she has. She was very ill the second night, but a change came about day-break. The fever left her then and she went to sleep and has been doing well ever since. If you will go out and stand on the north side of the hospital I will show her to you through the window."

Helmi's face beamed with the prospect. "What will I have to pay?" she asked the nurse.

"Nothing, dear, not a cent. The City provides this hospital, everyone

Are You Ready

When your Children Cry for It

Baby has little upsets at times. All your care cannot prevent them. But you can be prepared. Then you can do what any experienced nurse would do—what most physicians would tell you to do—give a few drops of plain Castoria. No sooner done than baby is soothed; relief is just a matter of moments. Yet you have eased your child without use of a single doubtful drug. Castoria is vegetable. So it's safe to use as often as an infant has any little pain you cannot put away. And it's always ready for the older children. Twenty-five million bottles were bought last year.

Fletcher's CASTORIA

W. N. U. 1743

pays for it, so do not worry over that.

"It is like a dream," said Helmi, "everyone is so good."

When the nurse came with little Lili in her arms and Helmi saw the beloved little head of brown hair and the little face like an exquisite flower, her heart was full of love and gratitude, and when the nurse lifted the tiny hand and waved it toward can be.

"Thank God, you're alive, Helmi! You gave me an awful scare when you went away with the wild foreign look in your eyes. I did not know what you were up to, but I could only pray God to take care of you, for vain was the help of man and not known' where to look for you. My Gosh child, what have you done to your boots?"

Helmi told her about her flight through the woods, the coming of the dog, and everything.

Helmi could not see any more for the rush of happy tears. She came back into the office again to ask for Helmi.

"I almost forgot the other baby," she said, "is he doing well?"

"You are more concerned than his mother," said the nurse, "though his grandmother has been here several times. He will get better we think. He is a strong baby, but a baby needs to be loved. Care is not enough—there is something more."

"I know," said Helmi.

To the North Star Rooming House Helmi went to explain her absence, to her good friend, the Corbette.

Mrs. Corbett was alone, and over a cup of tea Helmi told her story. It was easy to tell Mrs. Corbett; she knew about God and how good He

"Look at that now! Ain't God wonderful? That's what. Christ said over and over again, only the people could sense it. Well, I'm glad you found peace, Helmi. It's the greatest gift God has sent to us. And you got the money, too? Well, get a new pair of boots, child, good strong ones. If a person has good boots and a good bed they're all right, for you are in one or the other of them all the time. And will you go to the Englishman's house, Helmi? But how can you live there alone, eight miles from the mines? If you were near enough you could run a boardin' house."

"I am going," said Helmi, "as soon as Lili's well enough. I am not a bit afraid now, and Mrs. Corbett, in the holidays won't you let Rosie and Danny come? We'll get a cow somewhere, and there will be well berries; and I know there will be lots of flour and oatmeal in the house, and you will be just like a picnic all summer. You will let them come, won't you, Mrs. Corbett?"

"It will be a lot easier to let them go than to try to stop them when they hear of it—they're fair wretched over you and the baby. Well, well, Helmi, dear, ain't it wonderful how things come out?"

When John Corbett was told the whole story that night, he sat for a long time smoking a meditative pipe, his gentle put-put coming the only sound in the room. Helmi was going to stay with them until Lili could be taken from the hospital. No, is being occupied, Helmi was to share Rosie's narrow bed, the lack of space of which would be amply overcome by the warmth of Rosie's affection.

Helmi sat on a couch which later would be turned into a bed for Danny, and enjoyed the luxury of having such a welcome as the Corbette gave her.

"I am thinking," said John Corbett, after a long pause, "that maybe the Englishman is the best man of the two."

"Oh, no, no, Mr. Corbett!" Helmi cried, distressed. "Mr. English is my good friend—I like him—he is so good—but I love my Jack. He is my man—there is a big kilista—what you call difference—isn't there, Mrs. Corbett? You tell him!"

"Tell him!" said Maggie Corbett, scornfully. "He knows, the sly old dog! He knows, I have often told him I'd rather be fightin' with him than agreein' with any other man. That's love—and he knows it!"

CHAPTER XXX.

Vehemoor, German prison camp, known also as Cellelager Six, was built on a peat bog from which the peat had been removed, leaving a swamp, raw mud, on which not even a plant or log would hold. When the prisoners stepped out of the door they went to their knees in the indescribable muck. The condition of the camp inside may be imagined. A crowded room of miserable men; two smoking stoves burning the smouldering peat; double rows of berths where greasy blankets on planks furnished the beds; despair written on young faces—despair and bitter hatred.

Here sat Jack Doran, on this wet night in January, 1917, listening to the sleet slithering down the small windows. He had been in three pris-

on camps before this, having attempted to escape from Cellelager and from Cellelager One, been caught and strangled, the last time in the dark cells at Cellelager. He was dressed in the garments supplied by the Red Cross for prisoners, and carried himself with something of his former erectness. A white V was showing in his brown hair and there were bars in his round his mouth. Two years of war had told on him. Still there was something about him that suggested hope. Many of the prisoners had the beaten look of men whose spirits are broken, the condition of soul desired by the German guards for the men under their care.

Jack Doran, thin, pale, determined, sat planning another escape. He had often wondered at himself for his tenacity. Life had not been so sweet that he should so earnestly desire it. In the days of his freedom he had not found happiness, but the fires of youth still burning in his heart urged him on. He had been captured in the night attack on Gaville, May 25, 1916, when part of his platoon lost their way in the darkness and found that they had an enemy behind them as well as ahead of them, and suffered under heavy artillery fire. Jack ran back to save his captain, who had fallen wounded, and they were both captured and separated, his captain going to another camp.

Jack had made his two other attempts in company with a Canadian who was captured the same day, but when punished the last time in Cellelager, his friend was sent to some other camp, for the German O.C. believed that separation would make it easier to hold these two adventurous ones.

Soon after coming to Vehemoor, Jack had been fortunate in finding a compass under a pile of peat in the bog where the prisoners were sent to work, probably left there by a prisoner who was fearful of having it found on him, and had abandoned it along with his hope of escape.

The possession of a compass, being proof of the desire to escape, was in German prison camps an indictable offence. But Jack had found a loose board in the wall beside his bunk, and there he now kept it.

There were two other men in the camp who had attempted escapes, and between them and Jack, a certain free-masonry existed. They met as often as they could to discuss their plans, and on the coldest days volunteered for work on the bog in order that they might have a few hurried words together. They knew that if they showed any unusual friendship they would be suspected of lying plans.

(To Be Continued.)

Not Too Early
"What time shall I report for work in the mornings?" asked the college youth upon receiving his first job.

"Oh, any time you like," replied the office manager, so long as you're here before eight."

Don't forget this is the day to remember not to forget.

MOTHER OF TWINS HELPED
Restored to Health by Taking Lydia E. Pinkham's Vegetable Compound

Mitchell, Ont.—"I had little twin babies and for quite a while after I was not so well. I could not do my work because of pains all the way up my legs at the back. I also had headaches and very little sleep. I took Lydia E. Pinkham's Vegetable Compound, and soon I was able to get up and do my work. I have taken two more bottles and I am fine, do my work without trouble and am gaining in weight and strength. I feel like a new woman. The Vegetable Compound to anyone." Mrs. F. STATION, Box 220, Mitchell, Ont.

Where Do They Go
Paris reports that every year there are 600 men and women in that city, many of them prominent and wealthy, who disappear and are never heard of again. Apparently there is no answer supplied for the very logical question: "Where do they go?"

Let Minard's Liniment Relieve Pain.

New Device Useful In Brain Operations

Swiss Scientist Has Perfected X-Ray For This Work

A method of investigating the brain by means of X-Ray photographs has been perfected by Dr. Max Ludin, director of the Hoesgen Institute of the Citizens' Hospital at Basle, Switzerland. Making use of the contact method generally used in X-Ray diagnosis of other conditions, Dr. Ludin has been able to locate exactly tumors in the brain, thus making removal of the tumor by operations much easier.

Air is pumped into the cavities of the brain where it shows as white patches in the X-Ray pictures. If one of the cavities contains a tumor, the air cannot penetrate into the cavity and so the white patch does not show.

In making X-Ray pictures of the medulla, which is the part between the spinal cord and the brain, a specially prepared oil is used instead of fluid. This oil is heavier than the spinal fluid which fills the medullary canal, so it flows down appearing in the picture as a black strip. If there is a tumor in the canal the strip stops at the upper edge of the tumor.

Dr. Ludin is now working with an oil lighter than spinal fluid by which he hopes to find the lower edge of the tumor, thus locating it exactly for operation.

Huskies Are Being Selected By Expert

Commander Byrd Will Rely On Dogs

In Polar Trip
Commander Richard Byrd is going to the South Pole with the latest form of transportation—the aeroplane—but he is placing his final hopes in the oldest form of Polar transportation, the husky dog. It was learned, when Dr. David E. Buckingham, Washington, veterinarian, was instructed to select the dogs for the expedition.

Dr. Buckingham, former Dean of George Washington University, veterinary school, will leave soon for Northern Canada to purchase eighty picked huskies. Twenty dogs, under the leadership of the famous Chitook, already are being trained in the White Mountains of New Hampshire.

The one hundred dogs will be assembled and placed aboard the ship Larsen, at San Pedro, California, about October 1.

Five of the best dogs will probably precede Byrd's aeroplane over the South Pole to be available in case of a forced landing or if the plane is unable to take the air again because of the rarified atmosphere, it was said.

Has Mastered the Art
Englishman Have Evidently Solved Question of Standing the Heat

The coolest individual in New York during hot days is the Englishman. He can sit in his hotel room wearing a coat and vest and keep cooler than the visitor of any other country. A Britisher rarely will attempt to fight the heat by discarding coat and vest. Rather he will make himself comfortable, order a pot of hot tea, jam and biscuits and take things calmly. The man from the west promptly discards coat, vest, collar, tie and rolls up the sleeves of his shirt. An Englishman who was a guest at the Astor recently, complained of the terrific heat, but sat throughout a long interview, dressed in a heavy tweed suit, with double-breasted vest, and did not show any outward signs of the weather he complained of.

Sounds Like High Finance
An Aberdeenian observed a bottle of whisky in a shop window priced at a half-penny. He went into the premises and asked for the bottle, taking a half-penny. The proprietor said that the card beside the bottle had fallen from another article, and that the price of the whisky was 12s. 6d.

The customer, however, called a policeman and the officer agreed that if the whisky was priced at a half-penny the man was entitled to it. He got the whisky and the half-penny, and when walking out of the shop with the spirit the officer said, "That's an awful carry-on to make over a bottle of whisky."

The Aberdeenian's smiling reply was, "That's nothing but what I'll be when Ah bring back the empty bottle for tuppence."

What most people call indigestion is usually excess acid in the stomach. The food has soured. The instant remedy is an alkali which neutralizes acids. But don't use crude herbs. Use what your doctor would advise.

The best help is Phillips' Milk of Magnesia. For the 50 years since its invention it has remained standard with physicians. You will find nothing else so quick in its effect, so harmless, so efficient.

Indigestion

One tasteless spoonful in water neutralizes many times its volume in acid. The results are immediate, with no bad after-effects. Once you learn this fact, you will never deal with excess acid in the crude ways. Go learn—now—why this method is supreme.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any druggist.

Teeth and Health

Issued by The Canadian Dental Hygiene Council and Published by The Saskatchewan Dental Society

MISSING TEETH
Your son is now grown up and should have his full complement of teeth, which is thirty-two.

But, the probabilities are that one or more are missing.

Now, of course, the most probable cause for this deficiency is the extractions of earlier years, which you may have forgotten. But, on the other hand, there may be this reason, that the one or more did not erupt.

The teeth more prone to non-eruption are in the order named, the third molar, upper cuspid, upper lateral, and lower second bicuspid.

1. A deciduous condition of a temporary tooth might destroy the germ of the permanent successor.

2. The premature extraction of a deciduous tooth might destroy, through injury, the permanent tooth germ beneath or dislodge it entirely.

3. Childhood diseases accompanied by high fever such as scarlet fever and measles, might, through their general disturbance, injure irreparably the tooth germ.

4. The retention, unduly long, of a temporary tooth, might prevent the eruption of its successor.

5. In the case of the cuspid, sometimes it is fully formed, but having taken up a position more or less horizontal, back of the incisor teeth, it fails to erupt.

6. With the third molar, we find that it is due to lack of room to erupt that it remains impacted in the jaw, quite as frequently it does not form at all.

So you observe that a tooth may be missing due to one of several causes for the most, they are preventable nature intending that each one should have his full complement of teeth.

CHOLERA INFANTUM
Cholera Infantum is one of the fatal ailments of childhood. It is a disease that comes on suddenly, especially during the summer months and unless prompt action is taken the little one may soon be beyond aid. Baby's Own Tablets are an ideal medicine in warding off this trouble.

They regulate the bowels and sweeten the stomach, thus preventing the dreaded summer complaints. They are an absolute safe medicine, being guaranteed to contain neither opiates nor any other harmful drugs.

They cannot possibly do harm—they are an absolute safe medicine, being guaranteed to contain neither opiates nor any other harmful drugs, always do good. The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Typist Abandons Swim
Miss Mercedes Gleitz, London typist, who last year conquered the Straits of Gibraltar, abandoned an attempt to swim the Irish Channel between Donaghadee, Ireland, and Portpatrick. The treacherous currents of the channel forced her to quit.

It Bids Pain Begone—When neuralgia, rheumatism, or lumbago cripples the back is the time to test the virtues of Dr. Thomas' Electric Oil. Well rubbed in it will still the pain and produce a sensation of ease and rest. A trial of it will establish faith in it.

Prince Albert Penitentiary is the only Canadian prison at which cordwood is produced. The last report on prison credits the Saskatchewan institution with producing 236 cords.

Minard's Liniment—a reliable first aid.

Though crossing watchmen, bells and gates may not halt the speeding reckless driver, the train can always be depended upon to do so.

May Serve Good Purpose

Latest Tragedy In Arctic Should Discourage Further Exploration
By "Plane"

Although not many men have visited the Arctic and Antarctic, these desolate areas of ice and water have taken a high percentage of brave lives, and some of the greatest epic of human endeavor, achieved at the cost of much suffering, and sometimes death, come from these dreadful little lands of civilization.

The experiences of the Noble expedition have filled the world with distress at the knowledge of men drifting for weeks on ice floes, suffering unknown hardships from cold and hunger and physical pain. What happened to some of them may never be known, nor how long they endured and how they ultimately died after waiting hopelessly for succor.

It is just as well, perhaps, that the Arctic keeps its secrets, but the whole adventure will have served some purpose if it causes a revulsion of public feeling against expeditions of this kind. The fate of the Noble party shows that under conditions such as are likely to be met with in these regions, the ship is no more reliable than the balloon was in the days of the Andre expedition, which left for the North Pole nearly thirty years ago and was never heard of again.

Little Helps For This Week

"God is not the author of confusion, but of peace."—1 Cor. xiv. 33.

Light strains of music, soft and low. That break upon a troubled sleep; I hear the promise, old and new, "God will His faithful children keep."

In Perfect Peace.
It stills the questionings and doubts, The nameless fears that throng the soul; It speaks of love unchanging, sure; And eases every ache and roll.

In Perfect Peace.
True peace is found only in the possession of God; and the possession of God here on earth consists only in submission to faith and obedience to law. Resist every forbidden joy; restrain every wish that is not referred to this will, banish all eager desires, all anxiety; desire only the will of God; seek Him alone, and you will find peace; you shall enjoy it in spite of the world.—Fenelon.

Recognized as a leading specialist for the destruction of worms, Moberg's Worm Expeller has proved a boon to suffering children everywhere. It seldom fails.

Taking His Revenge
Conductor—"To St. Paul, eh? Why don't you stay on and go to Glacier Park?"
Passenger—"Because I want to go to St. Paul."

Conductor—"Can I sell you a seat in the chair car?"
Passenger—"No, not today."

Conductor—"A nice dinner on the diner at one-fifty?"
Passenger—"Are you kidding me?"
Conductor—"Not at all; you're my barber, aren't you?"

Teacher: "What people are scattered all over the earth?"
Class (in chorus): "Pedestrians."

Some men never have any respect for gray hairs until they acquire some of their own.

Mrs. H. T. Fenion, of Vancouver, B. C. is visiting at the Trapp home. The Ladies Aid will meet at the Ellen Preston home on August 23rd.

Mrs. M. Rae returned Friday after spending one month with Mr. and Mrs. Campbell of Edmonton.

Miss J. Cameron of Edmonton is spending her holidays with Mr. and Mrs. J. G. Rae.

Mrs. H. W. Love and Grace, returned Wednesday after spending over six weeks at the coast.

Mr. and Mrs. W. Cole and Elsie, motored to Waskettou, Thursday to look over Mr. Cole's crop.

Mr. and Mrs. H. Burkholder, of Edmonton were in Irma Thursday renewing acquaintances. Mr. G. W. Knapp accompanied them.

A dance is being held at Roscherry School, Friday night, August 24th. Everybody welcome. Ladies: please bring cake.

Miss Olive Rush has been confined to her bed with an attack of rheumatic fever, but we are glad to hear she is improving.

Miss Beryl Lancaster, nurse in training of Lamont Public Hospital left Monday after spending her holidays the guest of Miss Inez Fenton.

The garden party at the Smallwood home was a decided success. Everyone had a good old visit with his neighbor and enjoyed the ice cream and cake.

Miss Inez Fenton, B. N. who has been assisting at the Lamont Hospital for the last month while the matron was on holidays, is home again.

Richard Larsen, the Cocksfoot agent received a car of twine Thursday. This is the fourth car of twine to arrive at Irma this year.

The Ladies Aid of Sunny Brae are having a lawn social at the home of Mr. Jas. Fenton on Wednesday, August 22nd. Everybody come and have a good time.

Mrs. Jas. Cheaters and her daughter Grace returned to their home at Rivers Manitoba, Tuesday, after spending one week with Mrs. Cheater's sister, Mrs. K. A. Maguire.

Mrs. S. J. McKnight and Miss Josephine Gillis returned Thursday from Vancouver and other places of interest at the coast to finish their visit with Mr. and Mrs. Jas Fenton before returning home to Chatham, N. B. on Monday.

Binders, are humming in all parts of the Irma district, cutting one of the best crops the farmers have had for several years. No frost/hail or insect pests have been reported and the plentiful supply of moisture at the right time has caused the grain to fill in good shape.

Mr. Joseph Hammond of Rivers, accompanied by his two sons was in Irma the first of the week looking over Mr. Hammond's homestead north east of Irma. Mr. Hammond was one of the first homesteaders in the Irma district but has been with the C. N. R. for some years.

The Kiefer theatre opened Wednesday with a full house. Everyone appeared to enjoy the film and lighting effect. The next show will be held next Wednesday night. During harvest the show will start at 9 P. M. so as to give the farmers a chance to do as much cutting and harvest work as possible before coming to town.

Mr. E. L. Cook jeweler and optician, intends taking a motor trip to the east to visit his old home and will not be in Irma till September 13th, after this date he will again resume his weekly visits. Since Mr. Cook opened his office in Irma he has enjoyed a very satisfactory business and it looks as if he would be kept busy on his return from the east.

Mr. and Mrs. A. M. Campbell returned the first of the week after motoring to Vancouver and other B. C. points. Mr. Campbell, whose health has not been good for some time has secured a six months leave of absence from the bank and intends leaving shortly for Calgary where he will take special treatment.

Actual sales of Canadian Pacific Railway farm lands for the first three months of the year have been double those of the corresponding period of 1927. Enquiries for farm lands generally have increased in the same proportion.

Quebec, Quebec.—The mineral production of the Province of Quebec for the fiscal year ending June 30, 1928, will be well in excess of production if the activity continues, according to a statement from the Provincial Department of Mines, just issued.

Saint John.—The Maritime Provinces can find a good market in South and West Africa for their manufactured and natural products, according to J. J. S. Tyrer, who recently returned from there. A vast trade, he claimed, could be worked up in salt fish.

Vernon.—For the first time in the history of bee-keeping in British Columbia one bee-keeper in the Okanagan Valley has exported a full carload of honey from his own hives. His 250 colonies gave him an average of 175 pounds of honey per colony.

Ottawa.—A survey will be made this year for a Canadian air mail route between Montreal and Winnipeg. This will consist of determining the best routes and locating landing facilities. Recent announcement of four air mail contracts between points in Eastern Canada forecast more extensive operations along this line at an early date.

Midland, Ont.—For the first time in the history of this progressive town, a through Canadian Pacific train left here early in May for Toronto, and the first C. P. R. through train arrived from Toronto later in the day. A bottle of champagne was broken across the fender of the C. P. R. locomotive as it pulled out of Midland.

Ski-ing in July and August will be a prominent feature of the combined winter and summer camp to be operated in the Canadian Rockies under the shadow of Mount Asiniboine by Marquis N. de la Albitz. The winter sport is made possible by the fact of a huge glacier that runs down the slopes of the mountain. Summer sports of variety will also be possible at the camp, which is one of the beauty spots of that part of the Rockies traversed by the Canadian Pacific.

Toronto.—Premier G. H. Ferguson announces that the Government has signed a contract with the Canadian Pacific Railway for the supplying of two additional cars to be used as "travelling schools" in the outlying districts of the province. The cars will be equipped in Winnipeg and both will run out of Fort William, operating between that city and Superior Junction. At present two cars are in operation, both in Northern Ontario. Not only children of trappers and railway workers, etc., receive instructions in these travelling schools but night classes are arranged for adults.

Quebec, Que.—Announcement from Ottawa from Dr. W. H. Collins, Director of the Geological Survey of Canada, promise several survey parties in Quebec Province this year, making and investigating in to the geology and mineral resources of the province.

Six hundred delegates to the World's Baptists Congress meeting in Toronto, June 23-29, virtually chartered Canadian Pacific liner Montroyal, and were taken on from ships' side to Toronto by special C. P. R. train. Following the congress, the delegates make a trip across Canada to the Pacific Coast and return.

Edmonton, Alberta.—Looking to the improvement of wool produced by the sheep ranchers of the Prairies, a party of experts has started out under the direction of the Research Council of Canada to make a survey of the representative sheep ranches of the three provinces. British Columbia is included in the tour.

Winnipeg, Manitoba.—The formation of a dairy pool is suggested as a possible means of meeting the competition of Denmark in dairy produce on the British market by Sir Thomas Allen, leader of the co-operative movement in Great Britain and special envoy to the Empire Marketing Board at the wheat pool conference in Regina.

Indian Head, Saskatchewan.—One hundred million trees have been distributed throughout the Western provinces from the Forestry Farm here and its subsidiary at Sutherland, and the work is still progressing at an unabated rate. Practically all go free to farmers and an average of a car a day is shipped. The work was started in 1901.

The Alpine Club of Canada will hold its 23rd annual camp July 17-31 at the Lake of the Hanging Glacier in the Purcell Range of the Rockies. Banff will be the rail-head for the camp which is five hours motor journey farther on. Eleven peaks all above ten, and some exceeding eleven thousand feet in height, will be at the climbing disposal of the campers. There are also many others between nine and ten thousand feet high.
